

# DARC/RTIC DECODER

## MDC-2176

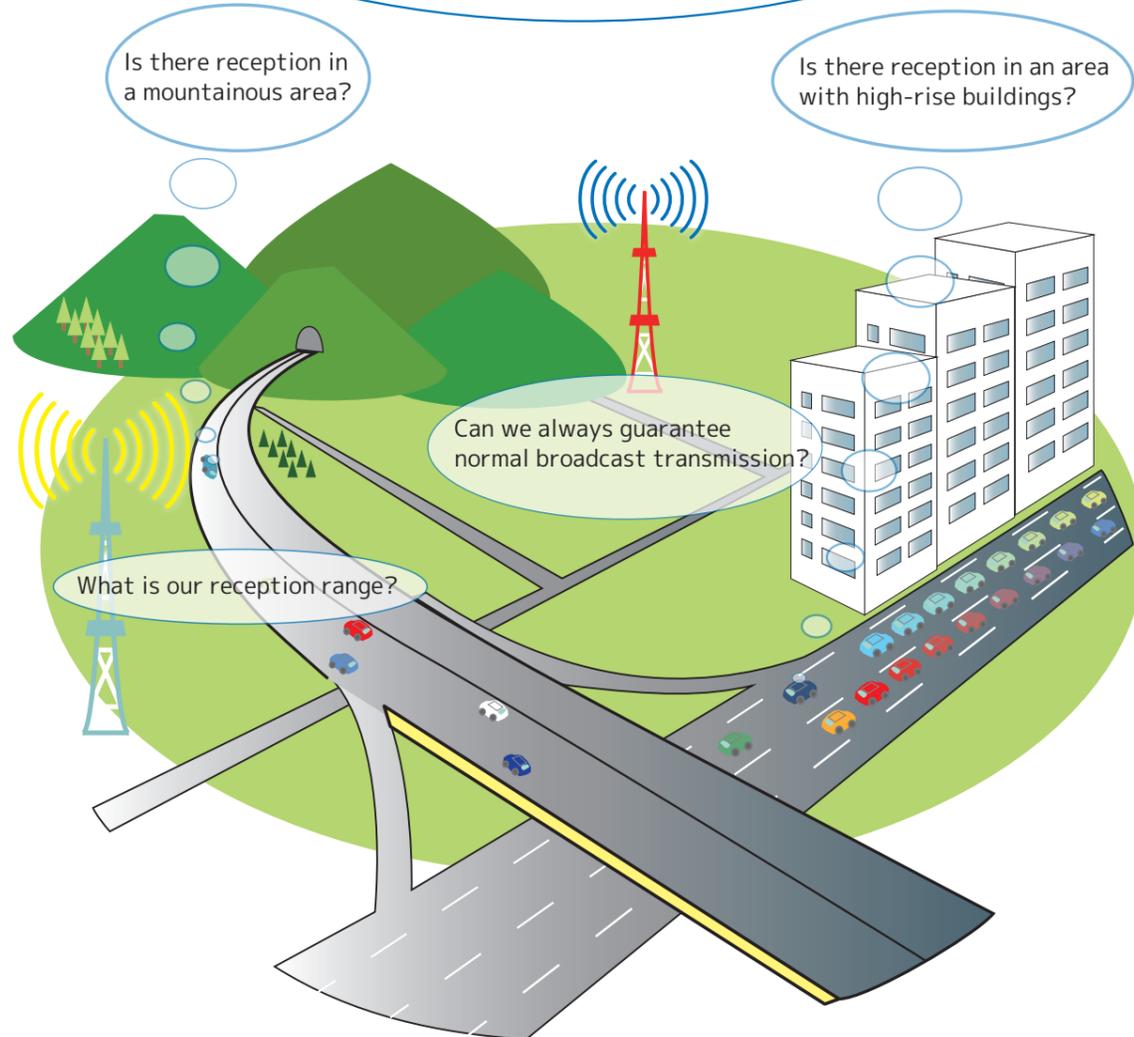

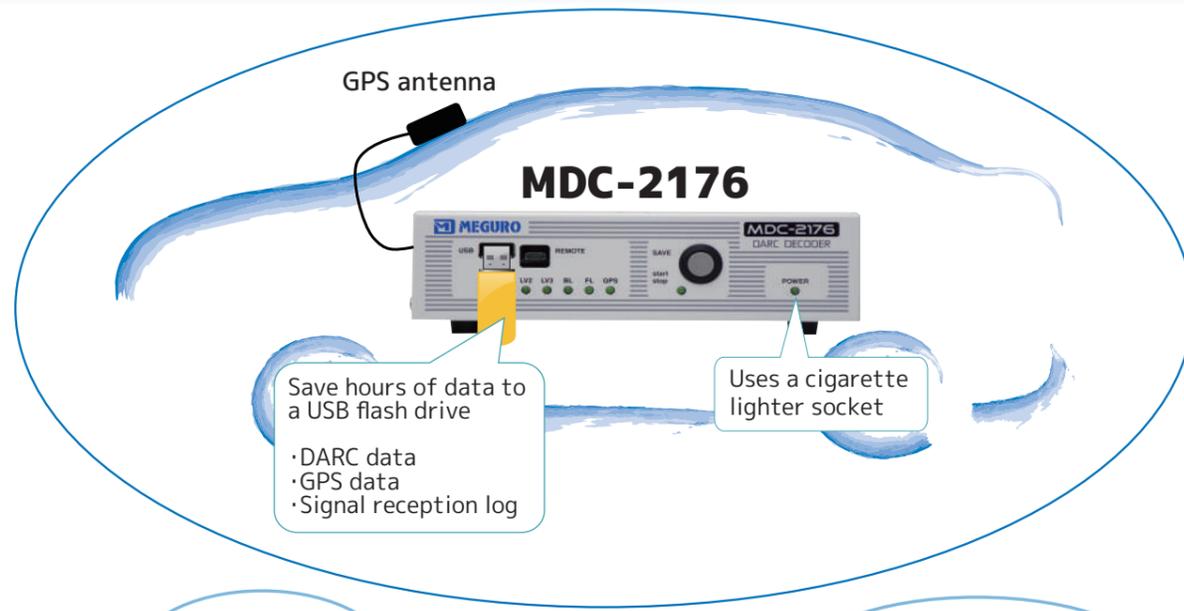

**Save of up to 28 days worth of continuous data captured from FM multiplex broadcasts**

- Small and light unit
- Wideband 76–108MHz
- Compatible for use with an in-car power supply
- Simultaneously record GPS location information
- USBSave 28 days of continuous recording onto a USB flash drive (8 GB)

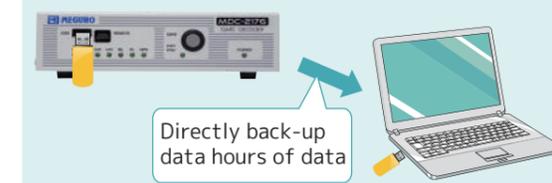

# Field Use Image

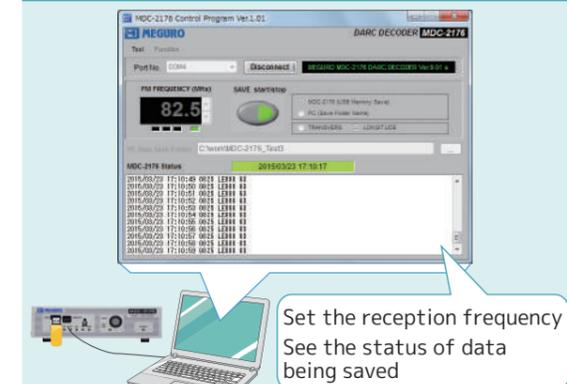

# Useful Functions

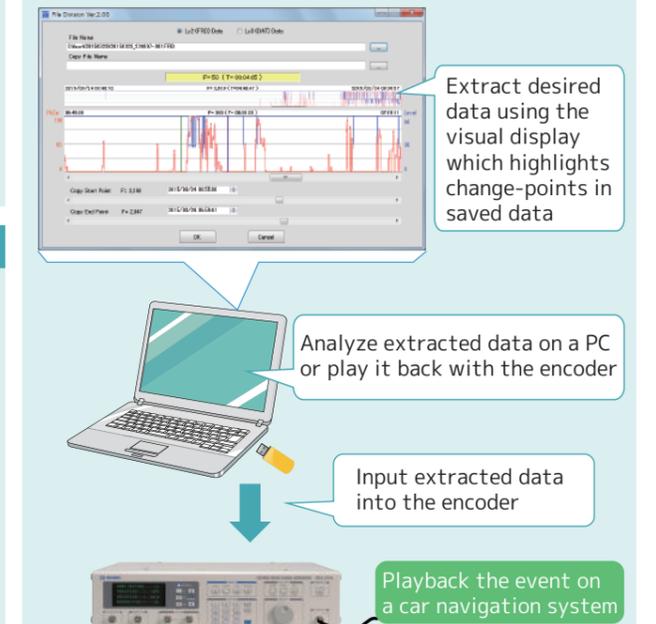

## Save to a USB flash drive

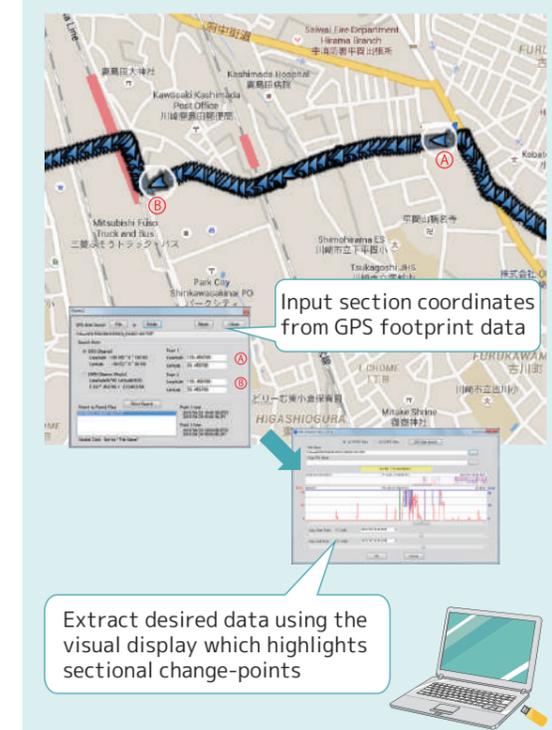

## Application

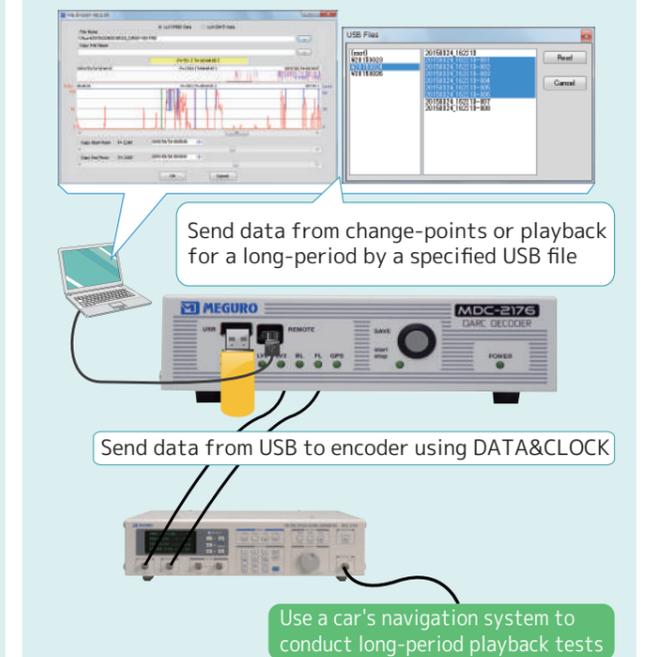

## Divide data by event changes

## Data division using GPS data

## Playback using DATA&CLOCK output and the encoder

※If you use the memory management option (extra charge), you can perform operations such as extracting parts of the data.

## Specification

Basic Specification	
FM reception frequency	76.0MHz~110.0MHz (100kHz steps)
RF input level	40dBuV~100dBuV
RF input terminal	BNC (75Ω)
Data storage capacity	External memory (USB storage)
Status LEDs	POWER (green) GPS (green) : GPS receiving OK BL (green) : BLOCK LOCK OK FR (green) : FRAME LOCK OK SAVE (green) : Saving DARC data RF (green) : RF input OK LV (green)×3 : Reception level (weak/average/strong)
Save button	Press to start/stop DARC data save
Output terminal	CLOCK output terminal BNC (3.3V) DATA output terminal BNC (3.3V)
GPS terminal	GPS antenna connection SMA

Other	
Power-supply voltage	AC adapter DC12V output (2A) input AC 100V~240V (switch mode)
Unit dimensions	H45 × W170 × D165 (mm) (excluding protruding parts)

Interface	
	USB2.0 (Type A) Hi-speed capable, use with a USB flash drive USB2.0 (micro B) Hi-speed capable, for use with a remote

Items included	Accessory kit (sold separately)
AC adapter USB flash drive GPS antenna	USB cable (TypeA - MicroB) Cigarette socket connector Rod antenna

## Function

Function	Description
DARC data save	Save received DARC data to a USB flash drive (save layer 2 and layer 3 simultaneously)
Saved data	Saved data is managed using files. Directly import the data saved onto a USB flash drive into a PC.
Save start/stop button	Start and stop recording data with the save start/stop button on the front panel. Conditions such as receiver frequency must be set up in advance using a dedicated application.
DARC data save 2 (PC transfer save)	Transfer and save in real-time received DARC data to a PC. Connect a PC by USB and simultaneously save layer 2 and layer 3 onto the PC.
DATA & CLOCK output	Output the DARC data being received or saved DARC data using the DATA & CLOCK output on the back of the unit (layer 2 only) ※ The user can choose whether to output either data being received or saved data when using the DATA & CLOCK output. ※ Data cannot be saved while using the DATA & CLOCK output.
Memory management option	The user can set the start and finish frames when using DATA & CLOCK output. (extra charge)
